

Amendment to the Specification

As requested by the Examiner, kindly substitute the specification appearing behind Tab A for the originally-filed version. A marked-up copy of the substitute specification appears behind Tab B. Having added merely headings and brief explanatory text and corrected the incorrectly-translated term “starting” to read “annealing,” Applicants believe no new matter has been included.

Amendment to the Drawings

Kindly amend FIGS. 1 and 6-10 by substituting the versions appearing behind Tab C for those originally filed. Applicants have revised these figures solely by changing the German-language abbreviation of weight percent (“Gew.-%”) to an English-language abbreviation (“wt.-%”).
